

The background features several coffee-related illustrations: coffee beans in the top left, a spoonful of beans in the top right, a glass of iced coffee with boba in the middle right, a cup of coffee on a saucer in the bottom right, and a bag of beans with a scoop in the bottom left.

BRIGHT COFFEE SHOP SALES ANALYSIS

Presented by
Mokgadi Lekoloana
01st July 2025

Introduction

This case study analyzes transactional sales data from Bright Coffee Shop between January and June 2023, following the appointment of a new CEO focused on revenue growth and product performance. The findings, analysis and recommendations will be outlined in the next slides

Objective

The goal of this analysis is to understand how products, customers, times of day, and stores are performing, so we can see what's working well and what needs improvement. This will help guide decisions to grow the business.

Analysis -Sales performance per Store Location

- Sales performance across Astoria (33.84%), Hell's Kitchen (33.23%), and Lower Manhattan (32.94%) shows a variance of less than 1%, highlighting consistent performance across all locations.

Analysis -Product Category Sales per Store Location

- **Top-Selling Product Category:**
Coffee leads in all three store locations, contributing over 38.63% of total sales.
- **Lowest- Selling Product Category:**
Packaged Chocolate consistently ranks lowest, accounting for less than 0.63% of revenue.

Analysis - Time of the Day trend per Month

- Morning is the peak sales period, contributing 51.1% of total sales.
- Afternoon follows with 29.8%, then Evening at 18.6%.
- Night shows the lowest sales at just 0.4%.
- The trend shows a clear decline in sales as the day progresses.

Analysis -Four Top and Lowest Selling Product Type

Product Type - Top	Sales Percentage
Barista Espresso	13,08%
Brewed Chai tea	11,03%
Hot chocolate	10,36%
Gourmet brewed coffee	10,02%

Product Type -Lowest	Sales Percentage
Sugar free syrup	0,33%
Organic Chocolate	0,24%
Green tea	0,21%
Green beans	0,19%

- Top four products contribute up to 44,49 % of total sales, indicating they are the main revenue drivers.
- The bottom four low-performing items like Green Beans, Organic Chocolate, and Sugar-Free Syrup combined contribute 0,97 % to overall sales.

Analysis - Total Sales by Spending Type

- **Medium Spenders** are the main contributors, accounting for **79,42%** of total sales revenue.
- **All other spending categories combined** contribute the remaining **20,58%**.

Analysis - Monthly Sales per Store Location

- **Total Sales (Jan-Jun):** R698,812.93 across all three stores.
- **Top Performer:** Hell's Kitchen led with 33.85% of total sales.
- **Sales Trend:** Steady monthly growth, with June as the busiest and January–February the quietest.
- **Overall Growth:** All stores more than doubled their sales, reflecting strong performance over the six months.

Findings

The analysis revealed both positive and negative findings, highlighting key strengths to build on and areas that need improvement. Below is a summary of these insights:

- Coffee is the dominant product, making up over 54% of total category sales at each location.
- Medium spenders contribute nearly 84% of revenue—making them the key revenue source.
- Night-time sales are insignificant (only 0.4%), while mornings drive over 52% of total sales.
- Sales are evenly distributed across stores, showing consistent performance (<1% variance).
- All stores show 100%+ sales growth from Jan to Jun, showing a strong upward trends.
- Products like Barista Espresso, Brewed Chai Tea, and Hot Chocolate are the top performers.
- Items such as Green Beans, Organic Chocolate, and Sugar Free Syrup contribute less than 0.5% each to overall sales.

Recommendations

Based on the findings from the analysis, the following recommendations are proposed to enhance performance, address areas of concern, and maximise opportunities for growth:

- Consider phasing out or bundling slow-moving product types like Organic Chocolate, Green Teas, and Green Beans with popular items to increase visibility and improve sales turnover.
- Design targeted campaigns to increase spending by low spenders through personalised offers and run promotions such as spend more, save more.
- Assess the need to reduce staffing during night shifts or use that time for pre-orders, stock preparation, or restocking, due to minimal sales activity at night.
- Investigate the low number of very high spenders by reviewing pricing, rewards, and product relevance for this customer group.

Conclusion

The sales analysis shows that overall performance is strong, with steady growth at all stores and high sales from coffee products. It also gives useful insights into how customers spend and when they buy. There are clear strengths, like strong morning sales, popular product categories and product types, but also areas that need attention, such as slow-selling items and low sales at night. The findings and recommendations can help guide better decisions to keep the business growing.

THANK
YOU
